

# CODEMAKERS LLC

## Capability Statement

## Company Overview

Codemakers LLC is a U.S.-based technology company specialized in enterprise software engineering, operational modernization, cloud-native architectures, workflow automation, and interoperable platform development for public and private sector organizations.

We support organizations seeking scalable, secure, and mission-oriented digital transformation initiatives through agile delivery models, systems integration capabilities, operational support services, and cloud-oriented engineering approaches aligned with evolving business and government operational requirements.

## Core Capabilities

- Enterprise Software Engineering
- Cloud-Native Solution Architecture
- API Development & Systems Integration
- Workflow Digitization & Process Automation
- DevSecOps & CI/CD Implementation
- Data Processing & Analytics Solutions
- Website Maintenance, Operational Support & Technical Helpdesk Services
- Enterprise Reporting & Operational Analytics
- Monitoring, Incident Tracking & Continuity Support
- Interoperability & Data Exchange Platforms
- Digital Case Management Systems
- Training Delivery & LMS Infrastructure
- Responsive Websites, Dashboards & Web Platforms
- Secure Database & Infrastructure Engineering
- Scalable Backend & Microservices Development Scalable Enterprise
- Operational Data Traceability Solutions
- Scalable Workflow Orchestration & Operational Processing Support

## Technical Capabilities

### Technologies & Platforms

- Node.js
- WordPress CMS Administration & Development
- Docker, Containerized Application Environments
- MySQL / PostgreSQL / SQL Server / Oracle / MongoDB
- Linux-Based Infrastructure
- RESTful APIs & Systems Integration
- WordPress, Bootstrap & Modern Front-End Frameworks
- Cloud & Hybrid Cloud Environments

- Microservices Architectures
- OWASP Secure Coding Practices
- Secure Authentication & Access Control
- Agile / Scrum Development Methodologies
- Workflow Automation & Data Processing Systems
- Reporting, Analytics & Data Visualization Platforms
- Monitoring & Observability Solutions
- AI-assisted operational analytics and data processing systems
- Scalable Enterprise Application Architectures
- Redis & Message Queue Architectures
- Containerized Application Environments

## Relevant Industry Experience

Due to confidentiality obligations and contractual agreements with clients, Codemakers LLC does not publicly disclose client identities or sensitive operational information. However, the company has supported projects and technology initiatives across multiple sectors, including:

- Healthcare technology and secure medical data platforms
- AI-assisted image analysis and clinical information systems
- Financial technology and electronic transaction platforms
- Cloud-based digital media and streaming environments
- Educational, training, and LMS management systems
- Enterprise workflow automation and reporting ecosystems
- Operational monitoring and traceability platforms
- Logistics, deployment coordination, and tracking systems
- Secure data exchange and interoperability initiatives
- Scalable API ecosystems and cloud-native infrastructures

Additional project information may be discussed under appropriate confidentiality arrangements.

## Leadership Experience

Codemakers LLC is led by senior technology leadership with more than 25 years of software engineering and systems development experience across enterprise, government-oriented, and international institutional environments.

Leadership experience includes participation in projects and consulting initiatives involving organizations and institutions such as:

- United Nations-related environments
- Inter-American Development Bank (IDB)
- Central American Bank for Economic Integration (CABEI/BCIE)
- World Bank-related initiatives
- Regional and operational technology organizations
- Telecommunications and enterprise operational environments

This experience includes software engineering, systems integration, operational modernization, enterprise platforms, workflow automation, technical coordination, and scalable digital environments across public and private sector initiatives.

## Differentiators

- Engineering approach emphasizing system responsiveness, query optimization, lightweight operational workflows, scalable backend architectures, and efficient resource utilization
- Agile engineering structure capable of rapid adaptation to evolving operational and technical requirements
- Strong focus on interoperability, enterprise modernization, and operational continuity initiatives
- Experience supporting secure, scalable, and cloud-oriented software architectures
- Operational support capabilities aligned with enterprise and government-oriented environments
- Flexible engagement model suitable for subcontracting, teaming arrangements, and modernization support initiatives
- Capability to support reporting environments, training systems, workflow automation, and deployment coordination
- Scalable delivery approach aligned with public sector and enterprise digital transformation objectives
- U.S.-registered entity with active SAM.gov registration, UEI, and CAGE credentials

## Federal & Business Information

**Legal Name:** Codemakers LLC

**Business Type:** U.S. Limited Liability Company

- SAM.gov Registration: Active
- UEI: Z6SRBLVZMF53
- CAGE Code: 208F4
- Small Business: Yes

Codemakers LLC is actively registered in the U.S. federal government's System for Award Management (SAM.gov) and maintains eligibility to conduct business with federal agencies and government contractors. The company maintains an active Unique Entity Identifier (UEI) and Commercial and Government Entity (CAGE) Code issued through the Defense Logistics Agency (DLA) CAGE Program.

Annual SAM.gov Renewal Date: May 5, 2027
